### PROJECTS

#### Helium Blockchain based Mobile App

##### Description

- As my first project it was a mobile application developed in the react native. This is based on helium blockchain. While working with some foreign developers my role was to develop the android application part only.

#### Scriptual Music Mobile App

##### Description

- It was a Scriptual music application developed in react native. As a project lead in this project my role was to develop the user interface for both android and IOS platforms.

#### Insurance Web App

##### Description

- I worked on this project for a very short period. In this project, my responsibility was to make the whole project permission-based access.

#### Trucks Management Mobile App

##### Description

- This is basically a mobile application developed in react native for drivers who are working in an America-based transport agency named. In this project, my responsibility was to develop an app from which a driver can chat, upload documents, and can share the live location with the company employees.
